

Privatising Planning Process in Victoria

The Brumby Government Planning Minister has produced a draft Bill designed to implement changes to the Victorian Planning & Environment Act that will allow 'authorised persons' (developers and their consultants) to prepare planning scheme amendments, exhibit changes and receive submissions. If this virtual privatisation of planning process is implemented, it will affect the authority of every Victorian council including yours, and communities will no longer have a say in local planning matters. Ask State election candidates what they intend to do about this and in the meantime, please support the Petition being circulated and return by 3rd December 2010 -
